

JONATHAN MARTINEZ

WEB DEVELOPER

OBJECTIVE

I am a highly-motivated, self-starting individual working as a web developer with a background in education and the arts. As a band director, I worked on a collaborative team that worked toward a common goal daily. I hope to find a team like this to work alongside as a developer where I can grow and contribute. I am passionate about learning and education and wish to carry that passion with me as I continue to improve my skillset. I also hope to make a positive and impactful difference in the world through my work in the field of web development.

PROFESSIONAL EXPERIENCE

Freelance Web Developer

5/3/2020–current

- Actively contributing to an open-source project with Reactjs Dallas.
- Actively organizing and hosting events for the FCC Dallas Group.
- **MyCircle** Social Media App- Collaborated with a back end developer to build a social media app. I was responsible for building the front end using React, TypeScript, SCSS, and Recoil.
<https://github.com/Jmartimus/SocialMediaApp>
- **Portfolio Page**- <https://www.JonathanMartinez.net> – my portfolio page which utilizes scss and html to make a visually responsive page.
- **MarsRoverApp**- An app that connects to the Mars Rover API and pulls down images based on date input. This is a React project that uses Recoil.js and Scss. <https://github.com/Jmartimus/Mars-Rover-App>
- **DiaryApp**- A full stack App that I will launch soon. It uses NestJs and PostgreSQL on the back end and React, Redux, Typescript, and SCSS on the front end. <https://github.com/Jmartimus/Diaryapp>
